Table 3. Information Technology Schedule Price List for SIN 132-51 19

Table 4. Information Technology Schedule Price List for SIN 132-54 24

Table 5. Information Technology Schedule Price List for SIN 132-55 123

Customer Information

1a. Awarded Special Item Numbers (SINs):

SIN	Description
132-51	Information Technology Professional Services
132-54	Commercial Satellite Communications (COMSATCOM) Transponded Capacity
132-55	Commercial Satellite Communications (COMSATCOM) Subscription Services

1b. Lowest Priced Model Number and Price for each SIN:

See Price List

1c. Services Offered:

See Price List

2. Maximum Order:

SIN	Maximum Order
132-51	$500,000 per SIN/Order
132-54	$500,000 per SIN/Order
132-55	$500,000 per SIN/Order

This maximum order threshold is a dollar amount at which it is suggested that the ordering agency request higher discounts from the contractor before issuing the order. The contractor may: (1) Offer a new lower price, (2) Offer the lowest price available under the contract, or (3) Decline the order within 5 days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the Schedule contract even though it exceeds the maximum order threshold.

3. Minimum Order:

SIN 132-51: The minimum dollar value of orders to be issued is $2,500.

SIN 132-54 & SIN 132-55: The minimum dollar value of orders to be issued is $100

4. Geographic Coverage (Delivery Area): The Geographic Scope of Contract will be domestic and overseas delivery.

5. Point of Production: United States

6. Discount from List Prices or Statement of Net Price:

Prices listed are net, discounts have been deducted and the industrial funding fee has been added.

7. Quantity Discounts: None

8. Prompt Payment Terms: None

Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9a. Government Purchase Cards are Accepted up to the Micro-Purchase Threshold.

9b. Government Purchase Cards are Not Accepted Above the Micro-Purchase Threshold.

10. Foreign Items: None

11a. Time of Delivery:

132-51: TBD at task order level
132-54: 15 days or less (Standard)
132-55: 7 days or less (Accelerated), 4 Hours or less (Time-Critical Delivery), >15 days (Extended)

11b. Expedited Delivery: Contact Contractor

11c. Overnight and 2-Day Delivery: Contact Contractor

11d. Urgent Requirements: Contact Contractor

12. F.O.B. Point: Not applicable

13a. Ordering Address:

Artel, LLC
13665 Dulles Technology Drive, Suite 300
Herndon, VA 20171
Attn: Federal Supply Schedule Program Manager
Phone: 703-620-1700
Fax: 703-620-4262

13b. Ordering Procedures:

For supplies and services, the ordering procedures and information on Blanket Purchase Agreements (BPAs), are found in Federal Acquisition regulation (FAR) 8.405-3.

14. Payment Address:

Artel, LLC
13665 Dulles Technology Drive, Suite 300
Herndon, VA 20171
Attn: Accounts Receivable

For electronic payments, our bank information is listed below:

Citizens Bank of Pennsylvania
3025 Chemical Road
Plymouth Meeting, PA 19462
Account Name: Artel LLC, Collection Acct
Account # 036076150
Routing # 6233180442

15. Warranty Provision: Standard Commercial Warranty

16. Export Packing Charges: Not Applicable

17. Terms and Conditions of Government Purchase Card Acceptance: None

18. Terms and Conditions of Rental, Maintenance, and Repair: Not Applicable

19. Terms and Conditions of Installation: Not Applicable

20. Terms and Conditions of Repair Parts: Not Applicable

20a. Terms and Conditions for Any Other Services: Not Applicable

21. List of Service and Distribution Points: Not Applicable

22. List of Participating Dealers: Not Applicable

23. Preventive Maintenance: Not Applicable

24a. Special Attributes: Not Applicable

24b. Section 508 Compliance Information: Not Applicable

25. Data Universal Number System (DUNS) Number: 190644401

26. Contractor Has Registered in the System for Award Management (SAM) Database.
Artel has registered in the System for Award Management (SAM) database.
The CAGE code is 0N511.

Terms and Conditions Applicable to Information Technology (IT) Professional Services (Special Item Number 132-51)

1. Scope

a. The prices, terms and conditions stated under Special Item Number 132-51 Information Technology Professional Services apply exclusively to IT Services within the scope of this Information Technology Schedule.

b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. Performance Incentives I-FSS-60 Performance Incentives (April 2000)

a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.

b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.

c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. Order

a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. Performance of Services

a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.

d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. Stop-Work Order (FAR 52.242-15) (AUG 1989)

(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop- work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

(1) Cancel the stop-work order; or

(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

(b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and

(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

(c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop- work order in arriving at the termination settlement.

(d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop- work order.

6. Inspection of Services

In accordance with FAR 52.212-4 CONTRACT TERMS AND CONDITIONS--COMMERCIAL ITEMS (MAR 2009) (DEVIATION I - FEB 2007) for Firm-Fixed Price orders and FAR 52.212-4 CONTRACT TERMS AND CONDITIONS –COMMERCIAL ITEMS (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

7. Responsibilities of the Contractor

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. Responsibilities of the Ordering Activity

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

9. Independent Contractor

All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. Organizational Conflicts of Interest

a. Definitions

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. Invoices

The Contractor, upon completion of the work ordered, shall submit invoices for IT Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. Payments

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and

accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:

(a) The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.

(b) The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—

(1) The offeror;

(2) Subcontractors; and/or

(3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

13. Resumes

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. Incidental Support Costs

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. Approval of Subcontracts

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. Description of IT Professional Services and Pricing

Refer to the Information Technology Schedule Price List for 132-51 for Descriptions of IT Professional Services and Pricing.

Terms and Conditions Applicable To Commercial Satellite Communications (COMSATCOM) Transponded Capacity (Special Item Number 132-54) and Commercial Satellite Communications (COMSATCOM) Subscription Services (Special Item Number 132-55)

1. COMSATCOM Capacity and Coverage.

The Ordering Activity shall specify the capacity and coverage required as part of the initial requirement.

2. Information Assurance

a. The Ordering Activity is responsible for ensuring to the maximum extent practicable that each requirement issued is in compliance with either the Committee on National Security Systems Policy (CNSSP) 12, "National Information Assurance Policy for Space Systems used to Support National Security Missions," or the Department of Defense Directive (DoDD) 8581.1, "Information Assurance (IA) Policy for Space Systems Used by the Department of Defense."

b. The Ordering Activity shall assign an impact level (per Federal Information Processing Standards Publication 200 (FIPS 200), *"Minimum Security Requirements for Federal Information and Information Systems"*) prior to issuing the initial statement of work. Evaluations shall consider the extent to which each proposed service accommodates the necessary security controls based upon the assigned impact level, command encryption/authentication, and other requirements in CNSSP 12 or DODD 8581.1. The Contractor awarded SIN 132-54 and/or 132-55 is capable of meeting at least the minimum security requirements assigned against a low-impact information system (per FIPS 200).

c. The Ordering Activity reserves the right to independently evaluate, audit, and verify the IA compliance for any proposed or awarded COMSATCOM services. All IA security assessments and authorization activities are the responsibility of the ordering activity.

3. Delivery Schedule.

The Ordering Activity shall specify the delivery schedule as part of the initial requirement. The Delivery Schedule options are found in *Information for Ordering Activities Applicable to All Special Item Numbers*, paragraph 6. *Delivery Schedule*.

4. Portability.

When an Ordering Activity requires portability, this requirement shall be included as part of the initial requirement. When portability is exercised, evidence of equivalent net present value (NPV)[1] shall be provided by the contractor. Ordering Activities may propose additional terms and conditions within the requirement (example: specific predefined, guaranteed terms and conditions for portability and related services). However, if the supplemental terms and conditions contradict the contract, the contract takes precedence. Portability provides the

[1] 1 For example, one-year of service for a transponder valued at $1M/year is traded for six-months of service on a transponder valued at $2M/year.

Ordering Activity the ability to relocate or "port," COMSATCOM Services resources as user requirements change. Descriptions of portability may include moving from one transponder/ satellite to another, one managed service area to another, transponded capacity redeployment between beams or transponders on a single satellite, redeployment from one frequency band to another, physical relocation of a satellite to a new orbital position, re- routing of teleport services from one teleport to another predefined teleport, re-routing of traffic from one terrestrial infrastructure to another predefined infrastructure, and movement of Network Operations Center (NOC) services from one NOC to another NOC.

5. Flexibility/Optimization.

When an Ordering Activity requires re-grooming resources for spectral, operational, or price efficiencies, this requirement shall be included as part of the initial requirement. When flexibility/optimization is exercised, evidence of equivalent net present value (NPV)[2] shall be provided by the contractor. Ordering Activities may propose additional terms and conditions within the requirement (example: specific pre-defined, guaranteed terms and conditions for re-grooming). However, if the supplemental terms and conditions contradict the contract, the contract takes precedence. Flexibility/optimization/re-grooming allows the Contractor to redistribute resources currently used to provide COMSATCOM Services (example: space segment, network, teleport, terminal resources) or customers sharing the COMSATCOM Services resources (example: customer one with typical peak usage at 9:00 a.m. and customer two with typical peak usage at 3:30 p.m.), enabling the Ordering Activity to gain spectral, operational, and/or price efficiencies.

6. Net Ready (Interoperability)

When an Ordering Activity requires interoperability, this requirement shall be included as part of the initial requirement. Interfaces may be identified as interoperable on the basis of participation in a sponsored program acceptable to the Ordering Activity. Any such access or interoperability with teleports/gateways and provisioning of enterprise service access will be defined in the individual requirement.

7. Network Monitoring (NET OPS)

The Ordering Activity shall specify the Network Monitoring (Net Ops) collection and delivery requirements (example: format, frequency) as part of the initial statement of work. The Contractor awarded SIN 132-54 and/or 132-55 is capable of collecting and delivering the near real-time monitoring, fault/incident/outage reporting, and information access required to ensure effective and efficient operations, performance, and availability consistent with commercial best practices. Ordering Activities may propose additional terms and conditions within the requirement (example: specific pre-defined terms and conditions for Net Ops collection and delivery.) However, if the supplemental terms and conditions contradict the contract, the contract takes precedence.

[2] For example, one-year of service on a less efficient arrangement of contractor resources is traded for nine-months of services on a more efficient arrangement of contractor resources that provides an operational efficiency to the Ordering Activity's customers.

8. EMI/RFI Identification, Characterization, and Geo-Location

When an Ordering Activity requires Electro Magnetic Interference (EMI)/Radio Frequency Interference (RFI) identification, characterization, and geo-location, it shall be included as part of the initial requirement. The Ordering Activity shall establish and use with the Contractor a mutually agreed upon media and voice communications capability capable of protecting "Sensitive, but Unclassified" data.

9. Security

The Ordering Activity is responsible for assigning the personnel and facility clearance levels for each requirement. If required, the Ordering Activity is responsible for issuing the appropriate security forms (e.g., a DD-254) for any special clearance requirements and indoctrinations, such as Sensitive Compartmented Information (SCI). Ordering Activities shall ensure the Contractor "masks" or "protects" Ordering Activity customers against unauthorized release of identifying information to any entity that could compromise the customer's operations security. Identifying information includes but is not limited to personal user and/or unit information including tail numbers, unit names, unit numbers, individual names, individual contact numbers, street addresses, etc.

10. Third Party Billing for COMSATCOM Subscription Services.

The Ordering Activity shall make every effort to educate the terminal owners or operators on usage of the approved network infrastructure to avoid third party charges.

11. Additional Terms and Conditions.

a. The Ordering Activity is responsible for determining the number of approaches each Contractor may offer in response to a statement of work.

b. If guidance is required, Ordering Activities may contact the GSA Satellite Communications Services Program Management Office (SATCOM PMO), satcom@gsa.gov.

c. For each Subscription Service requirement, the Ordering Activity shall negotiate with the Contractor any required Committed Information Rates (CIR). CIR is the average dedicated bandwidth data transfer rate (example: megabits per second) for an individual COMSATCOM Subscription Services network that the Contractor commits to delivering over a period of time. The Contractor may exceed the CIR if the network has capacity at any time.

12. Contract Clauses.

a. Ordering activities will be able to view the complete list of IT Schedule 70 contract clauses, including the specific contract terms and conditions for any specific contract holder, at:

   http://www.gsaelibrary.gsa.gov/ElibMain/contractsOnline.do?scheduleNumber=70

13. Description of COMSATCOM Services and Pricing

Refer to the Information Technology Schedule Price Lists for 132-54 and 132-55 for Descriptions of COMSATCOM Transponded Capacity and Subscription Services and Pricing.

Information Technology Schedule Price List for SIN 132-51

Description of IT Professional Services and Pricing (SIN 132-51)

Labor Category Qualifications

Substitution of Work Experience for a Degree
Four years of related work experience may be substituted for a required HS diploma. Three years of related work experience may be substituted for a required AA/AB degree. Five years of related work experience may be substituted for a required BA/BS degree. Eight years work experience may be substituted for a required MA/MS degree. 12 years of experience may be substituted for a required PhD.

If the candidate has a degree, the difference in work experience between the candidate's degree and the required degree is required. Thus a candidate with a an BA/BS degree for a position requiring an MA/MS degree needs 3 years related work experience.

Substitution of Degree for Work Experience
An AA/AB may be substituted for 3 years related work experience; a BA/BS degree may be substituted for five years work experience;

An MA/MS degree may be substituted for 8 years of experience; a PhD may be substituted for 12 years of experience.

Program Manager:

Education Requirements:

B.A. or B.S. Degree and 11 years

General Experience: Must have 11 years of progressively more responsible experience in information technology and program management. Must have a minimum of 5 years management experience on projects involving information technology systems analysis, systems design, software development, systems integration or telecommunications.

Functional Responsibilities: The Program Manager may manage multiple tasks, contracts or projects involving a team of personnel for each. The Program Manager is responsible for the overall day-to-day contract management, including interfacing and coordinating with customer and employee personnel on progress, schedules, and budgets. Gives direction and guidance to employee personnel based on project objectives and requirements. Program Manager controls company resources and funds, and has authority to negotiate and make binding decisions for the company.

Project Manager:

Education Requirements:

B.A. or B.S. Degree and 8 years

General Experience: Must have 8 years of progressively more responsible experience in information technology and project management. Must have a minimum of 3 years management experience on projects involving information technology systems analysis, systems design,

software development, systems integration, or telecommunications. Functional Responsibilities: The Project Manager manages a single large or multiple smaller tasks, contracts or projects. The Project Manager is responsible for the overall day-to-day project management, including interfacing and coordinating with customer and employee personnel on progress, schedules, and budgets. Gives direction and guidance to employee personnel based on project objectives and requirements.

Task Manager:

Education Requirements:

B.A. or B.S. Degree and 6 years

General Experience: Must have 6 years of progressively more responsible experience in information technology and task management. Must have a minimum of 1 year task manager or team leader experience on tasks involving information technology systems analysis, systems design, software development, systems integration or telecommunications.

Functional Responsibilities: The Group Manager is responsible for the day-to-day task management, including interfacing and coordinating with customer and employee personnel on activities associated with performing the task statement of work. Gives direction and guidance to employee personnel based on task objectives and requirements. Has technical skills in the areas required by the specific task being managed.

Subject Matter Expert

Education Requirement:

Senior: M.A. or M.S. Degree and 11 years
Intermediate: B.A. or B.S. Degree and 8 years

General Experience: Senior level must possess 11 years of experience directly applicable to the subject. Intermediate level must possess 8 years of experience directly applicable to the subject.

Functional Responsibilities: Provides expert support, analysis and research into exceptionally complex problems, and processes relating to the subject matter. Serves as technical expert on project teams providing technical direction, interpretation and alternatives. Thinks independently and demonstrates written and oral communications skills. Expertise is in a subject matter area including at least one of the following: Information Systems Architecture, Telecommunications Systems Design, Architecture or Implementation, Information Systems Integration, Software Development Methodologies, Security Engineering, or Communications and Network Systems Management.

Systems/Network Architect:

Education Requirement:

B.A. or B.S. Degree and 8 years

General Experience: Must have 8 years of experience in information technology, 3 years of which must be directly applicable to IT or Network systems design.

Functional Responsibilities: Performs engineering assignments related to the design of information technology, network or communications systems. Performs analysis of systems

design or architectural alternatives and tradeoffs. Performs and advises on cost/benefit tradeoff analyses.

Information Assurance Analyst:

Education and General Experience:

Senior Level:	B.S. Degree and 5 years
Intermediate Level:	B.S. Degree and 3 years
Junior Level:	B.S. Degree and 1 year

Certificate in a nationally recognized Information Systems Security organization (CISSP, CISA, CISM, Security +) may be considered equivalent to 3 years of experience. Certifications will be in accordance with Agency requirements, which are accordance with DoD Directive 8570.1, which provides the basis for an enterprise-wide solution to train, certify, and manage the DoD Information Assurance (IA) workforce, or similar Directives for Agencies, other than DOD, including time for obtaining allowed certification. The foregoing text applies to the Principal, Senior, and Intermediate levels. Please note, however, that the Junior level is exempt from said requirements.

Functional Responsibilities: Review, analyze, and coordinate development of information assurance policy, doctrine, directives, and regulations, and implementation of instructions. Apply a broad knowledge of principles, practices, and procedures of information security to include policy development, risk and vulnerability assessments, testing, and certification activities in support of accreditation, awareness training, documentation, and dissemination of information. Configure solutions that correct existing security problems. Conduct vulnerability testing of security product suites. At Senior level, provide technical work leadership and direction to lower-level analysts.

Information Assurance Functional Analyst:

Education and General Experience:

Senior Level:	B.S. Degree and 8 years
Intermediate Level:	B.S. Degree and 5 years

Certificate in a nationally recognized Information Systems Security organization (CISSP, CISA, CISM, Security +) may be considered equivalent to 3 years of experience. Certifications will be in accordance with Agency requirements, which are accordance with DoD Directive 8570.1, which provides the basis for an enterprise-wide solution to train, certify, and manage the DoD Information Assurance (IA) workforce, or similar Directives for Agencies, other than DOD, including time for obtaining allowed certification. The foregoing text applies to the Principal, Senior, and Intermediate levels. Please note, however, that the Junior level is exempt from said requirements.

Functional Responsibilities: Responds to complex application problems involving all phases of systems analysis to provide IA solutions. Provides technical support for secure software development and integration tasks, including the review of work products for correctness, adherence to the design concept and to user standards. Expert knowledge of IA application products and IA-enabling products such as PKI, VPN, Firewalls, Vulnerability Management tools, Intrusion Protection Systems, etc. Analyzes and recommends resolution of IA problems

based on knowledge of the major IA products and services, an understanding of their limitations, and an expert knowledge of the disciplines of IA.

Information Assurance Systems Installer:

Education and General Experience:

B.S. Degree and 5 years

Certificate in a nationally recognized Information Systems Security organization (CISSP, CISA, CISM, Security +) may be considered equivalent to 3 years of experience.

Functional Responsibilities: Analyzes IA communications and computer systems designs and layouts for hardware requirements, characteristics and determines feasibility of installation of IA capabilities and IA-enabling products. Develops detailed equipment list for installation of required systems. Configures systems to meet latest security technical guidelines. Installs network components, intrusion protection systems, firewalls, and computer equipment and systems according to installation design plans and guidance in accordance with standards and protocols of the site requirements.

Information Assurance Systems Engineer:

Education and General Experience:

B.S. Degree and 1 year

Certificate in a nationally recognized Information Systems Security organization (CISSP, CISA, CISM, Security +) may be considered equivalent to 3 years of experience. Certifications will be in accordance with Agency requirements, which are accordance with DoD Directive 8570.1, which provides the basis for an enterprise-wide solution to train, certify, and manage the DoD Information Assurance (IA) workforce, or similar Directives for Agencies, other than DOD, including time for obtaining allowed certification. The foregoing text applies to the Principal, Senior, and Intermediate levels. Please note, however, that the Junior level is exempt from said requirements.

Functional Responsibilities: Performs a variety of routine project tasks applied to specialized technology problems. Conducts security assessments and security consulting services. Analyzes information security requirements. Applies operating system security configuration. Applies analytical and systematic approaches in the resolution of problems of work flow, organization, and planning. Conducts technical security certification and accreditation activities for information technologies. Provides Help Desk support.

Information Assurance Task Order Manager:

Education and General Experience:

B.S. Degree and 5 years IT experience, of which 3 are in Information Assurance.

Certificate in a nationally recognized Information Systems Security organization (CISSP, CISA, CISM, Security +) may be considered equivalent to 3 years of experience.

Functional Responsibilities: Provides management for technical, engineering, and IA professional support. Manages one or more technical, professional services task orders under an overall contract. Utilizes IA expertise to establish and maintain ongoing contact with customer representatives to identify and respond to customer requests and ensure that potential sources of

difficulty are made known to senior management. Organizes and modifies the project team to complete assigned tasks and ensure optimum capability for generating new and follow-on business. Staffs the project. Identifies and schedules priorities for task completion to optimize schedules, budgets, and technical excellence. Reviews and approves all task order plans and deliverables. Assumes responsibility for all contracts administration within the task order. Establishes and maintains required status reports, including coordination of information gathering, report/graphics presentations, agenda, and so forth, for meeting internal and/or external established status review requirements.

Analyst:

Education and General Experience:

Principal Level:	B.A. or B.S. Degree and 11 years
Senior Level:	B.A. or B.S. Degree and 8 years
Intermediate Level:	B.A. or B.S. Degree and 5 years
Junior Level:	B.A. or B.S. Degree and No prior experience

Functional Responsibilities: Analyzes complex systems, operations and processes for the purpose of effecting improvements and efficiencies. Breaks complex systems or problems into major and minor components, identifies the interrelationships between components and processes and identifies major strengths and weaknesses. The Principal and Senior levels identify areas needing improvement and approaches to effecting change.

Programmer:

Education and General Experience:

Senior Level:	B.A. or B.S. Degree and 8 years
Intermediate Level:	B.A. or B.S. Degree and 5 years
Junior Level:	B.A. or B.S. Degree and 2 years

Functional Responsibilities: At the Senior Level, analyzes requirements, develops specifications for programming activities, and develops block diagrams and logic flow charts. All levels; translates design into computer code, tests, debugs, maintains and documents software.

Systems Engineer:

Education and General Experience:

Principal Level:	B.A. or B.S. Degree and 11 years
Senior Level:	B.A. or B.S. Degree and 8 years
Intermediate Level:	B.A. or B.S. Degree and 5 years
Junior Level:	B.A. or B.S. Degree and 2 years

Functional Responsibilities: Designs enterprise information processing systems. Designs and develops solutions to business problems and user requirements. Analyzes design and solution alternatives for tradeoffs and cost/benefit. Applies knowledge of commercially available hardware, software and standards to the design analysis.

Computer Systems Analyst, Intermediate

Education and General Experience:

B.A or B.S. Degree or equivalent, and 5 years

Functional Responsibilities: Plans, conducts, and coordinates the development of complex and/or diverse computer programs, associated documentation, block diagrams, logic flowcharts, and coding. Participates in evaluating, selecting, and integrating toolsets and off-the-shelf software for applications. Analyzes and upgrades or replaces applications via client server and Web technology. Provides technical advice or consultation on difficult programming applications to other technical staff. Participates in developing programming and documentation standards as needed.

Software/Systems QA Specialist, Senior:

Education and General Experience:

B.A or B.S. Degree and 5 years.

Functional Responsibilities: Establishes a high-level software/systems quality assurance plan for monitoring customer software/systems quality assurance activities. Implements software/systems quality standards for life cycle, documentation, development methods, testing, and maintenance. Specifies functional and non-functional software/systems requirements. Establishes quantitative measurements and techniques for measuring software/ systems quality. Establishes software test standards and methods. Conducts complex software tests. Conducts design/code walkthroughs and/or peer reviews. Coordinates software documentation and monitors configuration management activities.

Information Engineer, Senior:

Education and General Experience:

B.A. or B.S. Degree, or the equivalent, and 5 years

Functional Responsibilities: Performs a variety of project tasks involving the definition, design, and development of new system requirements. Determines system specifications, input/output processes, and working parameters for hardware/software compatibility. Identifies, analyzes, and may resolve program support deficiencies. Analyzes existing systems. Coordinates design of subsystems and integration of the total system. Documents procedures and results in standardized terminology. Documents all problems and work performed to resolve them.

Database Engineer/Administrator, Senior:

Education and General Experience:

B.A. or B.S. Degree, or the equivalent, and 5 years

Functional Responsibilities: Analyzes database requirements of assigned project(s). Determines informational needs and elements, data relationships and attributes, proposed manipulation, data flow and storage requirements, and data output and reporting capabilities. Defines logical attributes and interrelationships. Designs data structures to accommodate database production, storage, maintenance, and accessibility. Tests designed applications utilizing database management software or general programming software. Installs, implements, and supports systems within the user base. Develops and installs new data dictionaries and screen layouts. Analyzes and inspects data before it is placed on line. Checks for completeness and accuracy of data. Identifies causes of errors.

Telecom Engineer:

Education and General Experience:

Principal Level:	B.A. or B.S. Degree and 10 years
Senior Level:	B.A. or B.S. Degree and 8 years
Intermediate Level:	B.A. or B.S. Degree and 5 years
Junior Level:	B.A. or B.S. Degree and 2 years

Functional Responsibilities: Performs engineering design and analysis in one or more of the following areas: satellite communications, transmission systems, fiber optic communications, switched networks, network management or control systems. Develops, operates and maintains telecommunications networks for voice, video or data. Evaluates existing systems for efficiencies and performance improvements. Develops strategies for performance improvements, identifying costs and tradeoffs. Develops specifications for acquisition of communications systems.

Software Engineer:

Education Requirement:

Senior Level:	B.A. or B.S. Degree and 8 years, 5 of which in software engineering field
Intermediate Level:	B.A. or B.S. Degree 5 years, 2 of which in software engineering field

Functional Responsibilities: Performs engineering assignments in the areas of software architecture design, software prototyping, source coding, testing and systems integration. Knowledgeable in software development methodologies, languages, and commercially available software. Analyses and advises on software design alternatives and tradeoffs.

Technician:

Education and General Experience:

Intermediate: A.A. or A.S. Degree and 5 years

Functional Responsibilities: Installs, maintains, and tests LANs, networks, digital and voice communications and other information technology systems and subsystems.

Training Specialist:

Education and General Experience:

Intermediate: B.A. or B.S. Degree and 5 years
Must be skilled in oral and written communications.

Functional Requirements: Develops and revises training courses and materials. Prepares all instructor materials including course outlines, background literature and training aids. Prepares student materials including manuals, workbooks, and handouts. Conducts training through formal classroom courses, workshops, seminars, and hands-on coaching.

Graphics Designer, Senior:

Education and General Experience:

B.A. or B.S. Degree, or equivalent and 5 years

Functional Responsibilities: Plans, produces, edits, and assists in writing graphic art for company proposals, contract deliverables, marketing materials, and other selected documents. Art may include, but is not limited to, tables, charts, flowcharts, viewgraphs/slides, brochures, forms, and other internal publications. Prepares, revises, prints, and stores artwork using computerized equipment such as Genigraphics, Compugraphics, Macintosh, and IBM-compatible personal computers. Utilizes desktop publishing software packages such as Ventura, PageMaker, SuperPaint, and MacWrite. Designs charts, tables, and slides for customer programs. Prepares company brochures, presentation/briefing graphics, letterhead, corporate capability packages, business cards, in-house signs, and so forth. Uses perspective, isometric, orthographic, and schematic techniques to prepare technical and nontechnical illustrations and line drawings for slide presentations, viewgraphs, reports, brochures, and so forth. Performs conceptual and visualization work. Determines style, technique, and medium best suited to produce desired effects and conform with reproduction requirements, or follows specific instructions regarding those variables.

Technical Writer/Editor:

Education and General Experience:

Senior Level: B.A. or B.S. Degree, or the equivalent and 5 years
Intermediate: B.A. or B.S. Degree, or the equivalent and 2 years

Functional Responsibilities: Researches, writes, edits, and proofreads technical data for use in documents or sections of documents. Materials may include manuals, procedures, specifications, training materials, installation guides, proposals, reports, marketing materials, and other technical and nontechnical information. Follows established procedures and formats. Ensures that the final product meets all required specifications. Ensures that technical documents are accurate, complete, and meet editorial standards. At the Senior level, follows material through production. Recommends overall organization and layout, mode of presentation, and publication methods. Ensures adherence to standards for quality, graphics, coverage, format, and style.

Project Administrator:

Education and General Experience:
A.A. or A.S. Degree or equivalent, and 4 years of experience.

Functional Responsibilities: Assists the program or project manager in administering the contract. Duties may include maintaining files of all project documentation, word processing and publishing support of project deliverables, collecting and monitoring employee timesheets and expenses, issuing purchase orders and processing invoices.

Information Technology Schedule Price List for SIN 132-54

Description of COMSATCOM Transponded Capacity and Pricing (SIN 132-54)

Artel provides all necessary services to allow customers to use the capacity effectively including link budget analysis, transmission planning, basic training, management and control of the capacity. Artel's M&C system monitors the space segment and other services provided by Artel. Artel provides RF carrier and spectrum monitoring utilizing 22 monitoring sites or nodes strategically located around the world to monitor more than 800 circuits globally. Each node is connected back to the Artel Network Operations Centers (NOCs) in three locations: Chantilly, VA; Elkridge, MD; and the Artel headquarters in Herndon, VA. The Chantilly and Herndon facilities are staffed 24x7x365; the Elkridge facility is the backup. Artel can provide trouble reporting function via the Remedy ticket system, or using the XML format.

Artel will provide 24x7 end-to-end monitoring and electronic reporting to the Government for EMI/RFI Identification, Characterization, and Geo-location. Satellite telemetry data is used to verify transponder operations and all downlink carrier signals are monitored on a continuous basis. Artel measures the following parameters as a part of the bandwidth management services:

Carrier c/kT
EIRP per carrier
Eb/No
Carrier center frequency
Carrier bandwidth and spectral shape
Total transponder power

Although network monitoring identifies and reports service outages with 10 minutes with status updates every 30 minutes until restoration, due to the complexity of interference detection and required analysis – initial reports for interference will be made within 1 hour of identification and updates reported every 2 hours until resolution.

Artel will provide space segment frequency band portability on a space available basis that will allow operators of multi-Band user terminals to select and/or change operating frequency bands and/or satellites in the same or different regions to adapt to changing mission requirements.

Artel currently provides bandwidth optimization services on several DSTS-G tasks and other contracts. Artel will work with the designated Government Points of Contact (POCs) to provide a plan to redistribute and optimize all the available bandwidth and power between the active users. Artel will provide bandwidth optimization and regrooming services at request. The bandwidth redistribution will optimize the leased bandwidth and allow the Government to take full advantage of all available bandwidth and power.

Pricing for SIN 132-54 is provided in the following pages in the section IT Schedule Price List. Please note that the space segment prices can vary depending on the supply and demand situation. Supply and demand and prices for commercial satellite transponder capacity are extremely sensitive to international economic and geo-political conditions. If a national crisis or international incident occurs that affects the availability of transport capacity, the Offeror reserves the right to petition the GSA and its customer for price considerations at the time of task order issuance. If an adjustment in pricing is needed, Artel will request such adjustment via

contract mod. The pricing information for SIN 132-54 is conveniently structured to allow for contract line item ordering. The pricing table for transponded capacity is structured as follows:

Column	Heading	Description
1	CLIN	Contract Line Item Number
2	Region	Satellite Coverage Area
3	Band	Frequency Band
4	Quantity MHz	Frequency Quantity in MHz offered
5	Duration Term	Duration of the service
6	Quantity Unit	per day or per month per MHz unit for price
7	Unit Price	Discounted Unit Price offered to GSA after applying IFF
8	NRC	Non-Recurring Charge

Transponded capacity pricing is followed by prices for Host Nations agreement, Bandwidth portability, and Flexibility/Optimization, Regrooming prices. The price to the Government for worldwide HNA services will be quoted on a case-by-case basis due to the widely varying nature of the effort required in each country. HNA CLINs apply to all frequency bands for each region. All necessary landing rights and frequency clearances are included in the CLIN pricing.

Information Technology Schedule Price List for SIN 132-55

Description of COMSATCOM Subscription Services and Pricing (SIN 132-55)

Artel offers COMSATCOM subscription services integrated with satellite capacity from commercial satellites. Artel subscription services are available globally in multiple regions and multiple frequency bands on a per- month-per site basis. Subscription services include pre-existing, pre-engineered fixed and mobile satellite services. We bundle all of the satellite capacity, teleports, terminals and access devices to deliver end-to-end data, voice, video and imaging applications. Artel subscription services include the necessary integration, configuration, and testing needed to ensure remote terminals can access the service once deployed in the field. The data rates are Committed Information Rates (CIRs) and the availability is 99.5%. The services can be delivered for a small network with few users to networks with hundreds of end-users.

Artel's M&C systems monitor the space segment and other services provided to customers. Artel provides RF carrier and spectrum monitoring utilizing 22 monitoring sites or nodes strategically located around the world to monitor more than 800 circuits globally. Each node is connected back to the Artel Network Operations Centers (NOCs) in three locations: Chantilly, VA; Elkridge, MD; and the Artel headquarters in Herndon, VA. The Chantilly and Herndon facilities are staffed 24x7x365; the Elkridge facility is the backup. Artel can provide alarms and reporting function via the Remedy ticket system, or using the XML format.

Artel will provide 24x7 end-to-end monitoring and electronic reporting to the Government for EMI/RFI Identification, Characterization, and Geo-Location. Satellite telemetry data is used to verify transponder operations and all downlink carrier signals are monitored on a continuous basis. As part of this service, Artel provides M&C of not only the space segment, but also the equipment. Monitored parameters include:

Carrier c/kT
EIRP per carrier
Eb/No
Carrier center frequency
Carrier bandwidth and spectral shape
New carrier detection/spurious signal power
Teleport SSPA status
Teleport LNA status
Teleport up and down converter status
Teleport dehydrator status
Teleport modem status and Eb/No, transmit levels, receive levels
Remote site status

Although network monitoring identifies and reports service outages with 10 minutes with status updates every 30 minutes until restoration, due to the complexity of interference detection and required analysis—initial reports for interference will be made within 1 hour of identification and updates reported every 2 hours until resolution.

Artel will provide space segment *frequency band portability* on a space available basis that will allow operators of multi-Band user terminals to select and/or change operating frequency bands and/or satellites in the same or different regions to adapt to changing mission requirements.

Artel services are billed on a per-site, per-month basis. The billing unit depends on the subscription service. Shipping, installation, and commissioning are included. Services come bundled with engineering, network management, and monitoring to ensure our services are of the highest quality. Artel subscription services pricing includes the Activation fees and Monthly subscription, all applicable taxes and fees and 24x7 support costs.

The following is a brief description of subscription services:

Internet Access Services

Artel's Internet Access services are available on worldwide basis. These services are available for different data rates and include equipment, gateways, and space segment.

VSAT Connectivity Services

VSAT Connectivity services are shared VSAT services on different platforms. The services are available at different data rate and monthly data allowances.

iDirect Services

These are dedicated satellite services on iDirect platform. These services are available at different data rates.

Managed Teleport Services

Artel's Managed Teleport Services provide teleport resources on a worldwide basis for customers needing to land satellite-based connections at commercial facilities. The elements comprising these services include access to the necessary antennas, uplink/downlink equipment and support resources to interface customer satellite traffic with terrestrial facilities. The leased line connections and Internet connectivity are not included. These subscription services are priced on a per Mbps basis per month.

Managed Connectivity Services

Artel's Managed Connectivity Services provide customers with worldwide connectivity between remote sites using satellite capacity, commercial teleports and terrestrial backhauls or Internet connections. These subscription services are priced on a per Mbps basis per month and include the necessary antennas, uplink/downlink equipment and support resources to interface customer satellite traffic with terrestrial interconnections via leased line, PSTN, or the Internet. The leased line connections and Internet connectivity are included.

Mobile Satellite Services

Artel's Mobile Satellite Services (MSS) provide voice, data, video, SMS and Internet services to connect mobile users and end-user remote locations worldwide using industry standard protocols. All Artel MSS services are based on proven services utilizing existing networks including Inmarsat, Iridium, Globalstar, Thuraya, Yonder and Orbcomm. The elements comprising these MSS services include highly portable satellite terminals, and airtime service plans. Artel's MSS Services include the following:

- Two-way voice and data communication between mobile or fixed handsets or subscriber units and other mobile and fixed devices
- One-way (simplex) data transmissions between a mobile or fixed device, that transmits its location or other telemetry information, and a central monitoring station

BGAN, FLEET and SWIFT Broadband Services

These voice and data services, available worldwide, utilize the Inmarsat geosynchronous satellites and core network to transport voice and IP data. Data is available as Standard IP (per megabyte pricing) or as dedicated Streaming Services (per minute pricing). Voice is priced per minute and SMS is priced per message.

For BGAN, Artel offers a standard service that enables users to activate the service and then pay for ad hoc use of voice, data and SMS. Four monthly Allowance Rate Plans (Entry, Mid, High and Super) are also offered. Under these plans, the user pays a monthly subscription fee (Per Subscriber Unit) and is allocated a data allowance in megabytes (MB). Once the monthly allowance has been "spent", additional charges will be applied for the amount of data (in MB) in excess of the allowance during each specific month.

FLEET Broadband is an enhanced maritime voice and data service utilizing the Inmarsat satellites. Similar to BGAN, for FLEET Broadband, Artel offers a standard service that enables users to activate the service and then pay for ad hoc use of voice, data and SMS. Three monthly Allowance Rate Plans (Entry, Mid, and High) are also offered. Under these plans, the user pays a monthly subscription fee (Per Subscriber Unit) and is allocated a data allowance in megabytes (MB). Once the monthly allowance has been "spent", additional charges will be applied for the amount of data (in MB) in excess of the allowance during each specific month.

SWIFT Broadband is an enhanced aeronautical voice and data service utilizing the Inmarsat satellites. Two classes of user terminals are available, termed Class 6 (high gain antenna) and Class 7. For SWIFT Broadband, Artel offers a standard rate plan that enables users to activate the service and then pay for ad hoc use of voice, data and SMS. Three monthly Allowance Rate Plans (Entry, Mid, and High) are also offered. The prices for SWIFT broadband services vary depending on the user terminal (UT) type (e.g., Class 6 or Class 7). Under these plans, the user pays a monthly subscription fee (Per Subscriber Unit) and is allocated a data allowance in megabytes (MB). Once the monthly allowance has been "spent", additional charges will be applied for the amount of data (in MB) in excess of the allowance during each specific month.

ISatPhone Service

This satellite phone service, available worldwide, utilizes the Inmarsat geosynchronous satellites and core network infrastructure to deliver voice and SMS services. Voice is priced per minute and SMS is priced per message.

Iridium Voice and Data Service

This satellite phone service, available worldwide, utilizes the Iridium low earth orbit satellites and core network infrastructure to deliver voice and low-rate, circuit-switched data services. The Iridium System is a satellite-based, wireless communications network providing a robust suite of data services to virtually any destination anywhere on earth. The design of the Iridium network allows data to be routed virtually anywhere in the world. Data calls are relayed from one satellite

to another until they reach the Iridium Subscriber Unit (ISU) or a commercial or government gateway in the U.S. Voice and data calls are priced per minute and SMS is priced per message.

Iridium Short Burst Data (SBD) Service

This Short Burst Data (SBD) service uses an Iridium proprietary network protocol to transfer data messages two- way from remote terminals for logistics and asset tracking as well as personnel tracking. The L-band service currently supports two way messaging anywhere in the world with a round trip time of 10-20 seconds. Artel offers a basic data plan that includes 30kbytes per month for a single monthly subscription fee per remote device. Additional message data is priced on a per kilobyte basis.

Globalstar Voice and Data Service

This satellite phone service, available worldwide, utilizes the Globalstar low earth orbit satellites and core network infrastructure to deliver voice and low-rate, circuit-switched data services. The Globalstar system provides voice and data services worldwide. Voice and data calls are priced per minute and SMS is priced per message.

Globalstar Simplex Service

This data service uses the Globalstar network and small, cost-effective devices for sending data (such as geographic coordinates) from assets in remote locations to a central monitoring station. The service provides for low rate burst data transmission from a simplex device using Globalstar's satellite and ground equipment. The small size of the devices make them attractive for use in tracking asset shipments, monitoring unattended remote assets, trailer tracking and mobile security. Artel offers a basic data plan that includes a low monthly access fee per remote device. Message data is priced on a per message basis.

Personnel Tracking Service

This service provides for personnel tracking, emergency location and messaging solutions beyond the traditional range of terrestrial and wireless communications. Artel offers a basic service plan that can be augmented with "type and send" message services including message allowance.

Thuraya Voice and Data Services

These services, available throughout Europe, Asia, the Pacific Rim and most of Africa, utilize the Thuraya geosynchronous satellites and core network infrastructure to deliver satellite phone services and broadband IP data services. Thuraya voice service is available using two different models of satellite phones and is priced per minute and SMS is priced per message. Broadband IP data services are offered by Artel in three plans (Basic, Basic Plus and Unlimited).

Orbcomm Tracking, Monitoring and Messaging Services

This service, available worldwide, utilizes the ORBCOMM network of low-Earth-orbit (LEO) satellites to provide cost-effective asset tracking, monitoring and messaging. Similar to two-way paging or e-mail, the system is capable of sending and receiving two-way alphanumeric packets of data. These short, economical messages increase the efficiency of remote operations by making critical information readily available, even from locations far beyond the geographic and economic reach of traditional systems. Artel offers a suite of price plans that vary according to the total number of message units required by a Subscriber Unit (SU) in any given month. Each

SU incurs an activation fee and a monthly subscription fee dependent on the plan selected to accommodate the total message units per SU per month.

Airborne Services

These are world-wide, Ku-Band, airborne coms-on-the-move services on Viasat's Yonder platform.

The pricing information for SIN 132-55 is conveniently structured to allow for line item ordering. The pricing table for subscription services is structured as follows:

Column	Heading	Description
1	CLIN	Contract Line Item Number
2	Region	Service Coverage Area
3	Service Description	A brief description of the service
4	Band	Frequency Band
5	Duration Term	Duration of the service
6	Data Rates	Uplink and Downlink data rates of the service
7	Price Unit	Per Site Per Month
8	Unit Price	Monthly Recurring Charge (MRC)
9	NRC	Non-Recurring Charge

Table 5. Information Technology Schedule Price List for SIN 132-55
